

TBox

for UR 10 Cobots

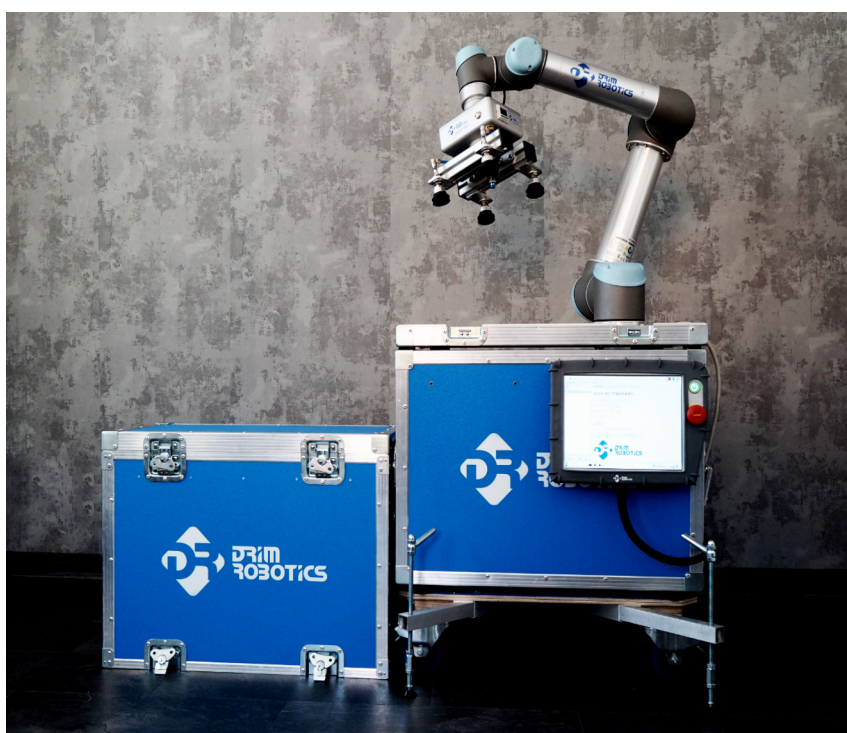

modular flightcase for transport
of collaborative robots

Strong, against possible Accidents, Delicate with your Cobot. Our TBox is the right place to store your Cobot, to use it for your demonstrations and to move it between different working zones. It is compact, easy, resistant and can contain more than just a Cobot, your complete Co-world.

TBox is composed of 3 units:

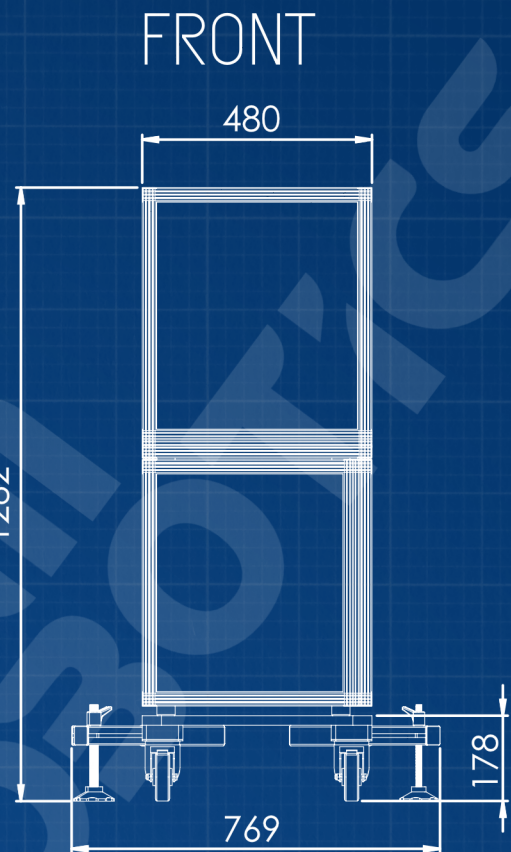

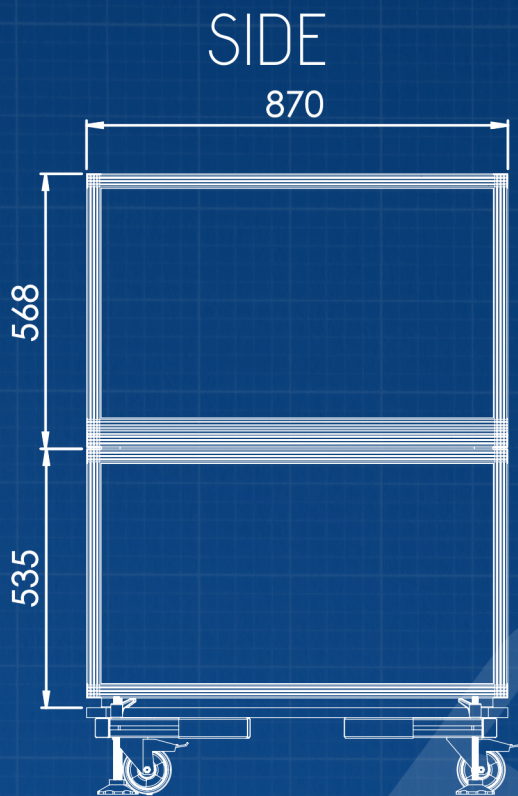

1. Wheels
2. Box1 (below) for Control cabinet
3. Box2 (above) for cobot's arm + storage for stability legs.

To load TBox inside a car, van, it is possible to separate units. For demonstrations it is enough to remove Box2, it can be used as table for applications, and to mount stability legs to help perform vision applications or mechanical applications.

Transport BOX

dimensions
Units: mm

Technical data:

Weight without / with robot:

Robot_Box - 20 kg / 56 kg

Control_Box - 14 kg / 30 kg

Truck - 9kg

Material:

Aluminum

Birch plywood

Black PVC foil

Backpressure foil

Compatibility:

UR3 – CB3/e-Series

UR5 – CB5/e-Series

Dimensions:

Height: 1282 mm

Length: 870 mm

Width: 480 / 769 mm

PERSPECTIVE SIDE / FRONT
