### Summary of Changes

This publication contains the following new or updated information. This list includes substantive updates only and is not intended to reflect all changes. Translated versions are not always available for each revision.

Topic	Page
Updated back cover	Back Cover

**Rockwell  
Automation**

## Environment and Enclosure

**ATTENTION:** This equipment is intended for use in a Pollution Degree 2 industrial environment, in overvoltage Category II applications (as defined in EN/IEC 60664-1), at altitudes up to 2000 m (6562 ft) without derating.

This equipment is not intended for use in residential environments and may not provide adequate protection to radio communication services in such environments.

This equipment is supplied as open-type equipment for indoor use. It must be mounted within an enclosure that is suitably designed for those specific environmental conditions that will be present and appropriately designed to prevent personal injury resulting from accessibility to live parts. The enclosure must have suitable flame-retardant properties to prevent or minimize the spread of flame, complying with a flame spread rating of 5VA or be approved for the application if nonmetallic. The interior of the enclosure must be accessible only by the use of a tool. Subsequent sections of this publication may contain more information regarding specific enclosure type ratings that are required to comply with certain product safety certifications.

In addition to this publication, see the following:

- Industrial Automation Wiring and Grounding Guidelines, publication [1770-4.1](#), for more installation requirements.
- NEMA Standard 250 and EN/IEC 60529, as applicable, for explanations of the degrees of protection provided by enclosures.

## Prevent Electrostatic Discharge

**ATTENTION:** This equipment is sensitive to electrostatic discharge, which can cause internal damage and affect normal operation. Follow these guidelines when you handle this equipment:

- Touch a grounded object to discharge potential static.
- Wear an approved grounding wriststrap.
- Do not touch connectors or pins on component boards.
- Do not touch circuit components inside the equipment.
- Use a static-safe workstation, if available.
- Store the equipment in appropriate static-safe packaging when not in use.

## North American Hazardous Location Approval

The following information applies when operating this equipment in hazardous locations:	Informations sur l'utilisation de cet équipement en environnements dangereux:
Products marked "CL I, DIV 2, GP A, B, C, D" are suitable for use in Class I Division 2 Groups A, B, C, D, Hazardous Locations and nonhazardous locations only. Each product is supplied with markings on the rating nameplate indicating the hazardous location temperature code. When combining products within a system, the most adverse temperature code (lowest "T" number) may be used to help determine the overall temperature code of the system. Combinations of equipment in your system are subject to investigation by the local Authority Having Jurisdiction at the time of installation.	Les produits marqués "CL I, DIV 2, GP A, B, C, D" ne conviennent qu'à une utilisation en environnements de Classe I Division 2 Groupes A, B, C, D dangereux et non dangereux. Chaque produit est livré avec des marquages sur sa plaque d'identification qui indiquent le code de température pour les environnements dangereux. Lorsque plusieurs produits sont combinés dans un système, le code de température le plus défavorable (code de température le plus faible) peut être utilisé pour déterminer le code de température global du système. Les combinaisons d'équipements dans le système sont sujettes à inspection par les autorités locales qualifiées au moment de l'installation.
<b>WARNING: EXPLOSION HAZARD</b> <ul style="list-style-type: none"><li>• Do not disconnect equipment unless power has been removed or the area is known to be nonhazardous.</li><li>• Do not disconnect connections to this equipment unless power has been removed or the area is known to be nonhazardous. Secure any external connections that mate to this equipment by using screws, sliding latches, threaded connectors, or other means provided with this product.</li><li>• Substitution of components may impair suitability for Class I Division 2.</li></ul>	<b>WARNING: RISQUE D'EXPLOSION</b> <ul style="list-style-type: none"><li>• Couper le courant ou s'assurer que l'environnement est classé non dangereux avant de débrancher l'équipement.</li><li>• Couper le courant ou s'assurer que l'environnement est classé non dangereux avant de débrancher les connecteurs. Fixer tous les connecteurs externes reliés à cet équipement à l'aide de vis, loquets coulissants, connecteurs filetés ou autres moyens fournis avec ce produit.</li><li>• La substitution de composants peut rendre cet équipement inadapté à une utilisation en environnement de Classe I Division 2.</li></ul>

**ATTENTION:**

- This product is grounded through the DIN rail to chassis ground. Use zinc-plated chromate-passivated steel DIN rail to assure proper grounding. The use of other DIN rail materials (for example, aluminum or plastic) that can corrode, oxidize, or are poor conductors, can result in improper or intermittent grounding. Secure DIN rail to mounting surface approximately every 200 mm (7.8 in.) and use end-anchors appropriately. Be sure to ground the DIN rail properly. Refer to Industrial Automation Wiring and Grounding Guidelines, Rockwell Automation publication [1770-4.1](#), for more information.
- Failure to connect a bus terminator module to the last expansion I/O module will result in a controller hard fault.
- Do not wire more than 2 conductors on any terminal.

**WARNING:**

- When you connect or disconnect the Removable Terminal Block (RTB) with field side power applied, an electrical arc can occur. This could cause an explosion in hazardous location installations. Be sure that power is removed or the area is nonhazardous before proceeding.
- When used in a Class I Division 2, hazardous location, this equipment must be mounted in a suitable enclosure with proper wiring method that complies with the governing electrical codes.
- If you connect or disconnect wiring while the field-side power is on, an electric arc can occur. This could cause an explosion in hazardous location installations. Be sure that power is removed or the area is nonhazardous before proceeding.
- If you insert or remove the module while backplane power is on, an electric arc can occur. This could cause an explosion in hazardous location installations. Be sure that power is removed before proceeding.
- Do not unscrew the RTB hold down screws and remove the RTB while power is on. This could cause an explosion in hazardous location installations. Be sure that power is removed before proceeding.

## Additional Resources

Resource	Description
Micro830, Micro850, and Micro870 Programmable Controllers User Manual, publication <a href="#">2080-JM002</a>	A more detailed description of how to install and use your Micro830, Micro850, and Micro870 programmable controllers.
Micro800 Bus Terminator Module Installation Instructions, publication <a href="#">2085-IN002</a>	Information on installing the bus terminator module.
Industrial Automation Wiring and Grounding Guidelines, publication <a href="#">1770-4.1</a>	More information on proper wiring and grounding techniques.
Product Certifications website, <a href="#">rok.auto/certifications</a>	Provides declarations of conformity, certificates, and other certification details.

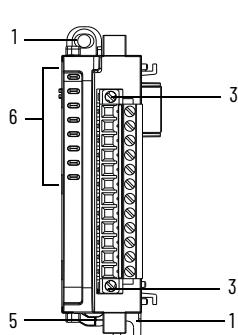

You can view or download publications at [rok.auto/literature](#).

## Overview

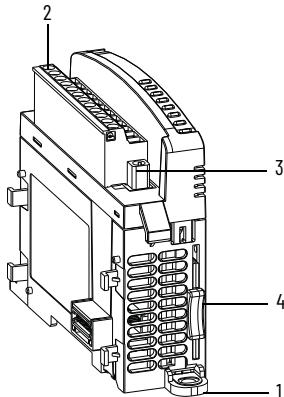

The Micro800™ expansion I/O is a modular I/O that complements and extends the capabilities of Micro850® and Micro870® controllers. These expansion I/O modules interface with the controllers using an I/O expansion port.

### I/O Module Overview

**2085-IA8 shown**

Front view

Right top view

### Module Description

Description		Description	
1	Mounting screw hole / mounting foot	4	Module interconnect latch
2	Removable Terminal Block (RTB)	5	DIN rail mounting latch
3	RTB hold down screws	6	I/O status indicator

This equipment is sensitive to electrostatic discharge (ESD). Follow ESD prevention guidelines when handling this equipment.

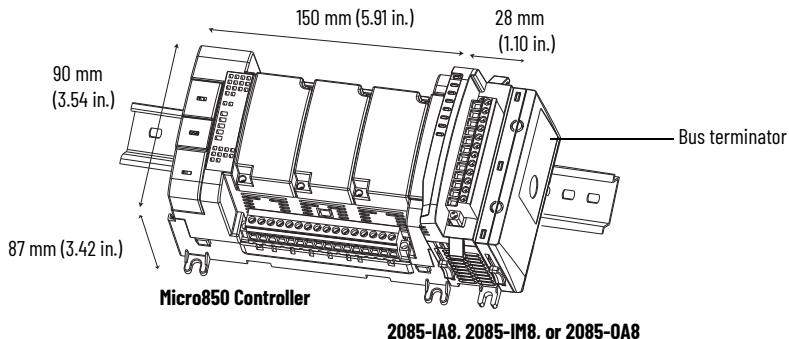

## Mount the Module

For more information on proper grounding guidelines, see the Industrial Automation Wiring and Grounding Guidelines, publication [I770-4.1](#).

## Module Spacing

Maintain spacing from objects such as enclosure walls, wireways, and adjacent equipment. Allow 50.8 mm (2 in.) of space on all sides for adequate ventilation, as shown.

## Mounting Dimensions and DIN Rail Mounting

Mounting dimensions do not include mounting feet or DIN rail latches.

## DIN Rail Mounting

The module can be mounted using the following DIN rails: 35 x 7.5 x 1 mm (EN 50022 - 35 x 7.5).

For environments with greater vibration and shock concerns, use the panel mounting method, instead of DIN rail mounting.

Before mounting the module on a DIN rail, use a screwdriver in the DIN rail latch and pry it downwards until it is in the unlatched position.

1. Hook the top of the DIN rail mounting area of the controller onto the DIN rail, and then press the bottom until the controller snaps onto the DIN rail.
2. Push the DIN rail latch back into the latched position.  
Use DIN rail end anchors (Allen-Bradley® part number 1492-EAJ35 or 1492-EAHJ35) for vibration or shock environments.

To remove your controller from the DIN rail, pry the DIN rail latch downwards until it is in the unlatched position.

## Panel Mounting

The preferred mounting method is to use two M4 (#8) per module. Hole spacing tolerance:  $\pm 0.4$  mm (0.016 in.). For mounting dimensions, see the Micro830®, Micro850, and Micro870 Programmable Controllers User Manual, publication [2080-UM002](#).

Follow these steps to install your module using mounting screws.

1. Place the module next to the controller against the panel where you are mounting it. Make sure that the controller and module are spaced properly.
2. Mark drilling holes through the mounting screw holes and mounting feet then remove the module.
3. Drill the holes at the markings, then replace the module and mount it.  
Leave the protective debris strip in place until you are finished wiring the module and any other devices.

## System Assembly

The Micro800 expansion I/O module is attached to the controller or another I/O module with interconnecting latches and hooks, and the bus connector. The controller and expansion I/O modules must terminate with a 2085-ECR Bus Terminator module.

Be sure to lock the module interconnect latches and tighten the RTB hold down screws before applying power to the module.

For installation of the 2085-ECR module, see the Micro800 Bus Terminator Module Installation Instructions, publication [2085-IN002](#).

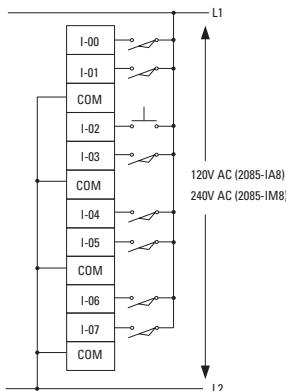

## Field Wiring Connections

In solid-state control systems, grounding and wire routing helps limit the effects of noise due to electromagnetic interference (EMI).

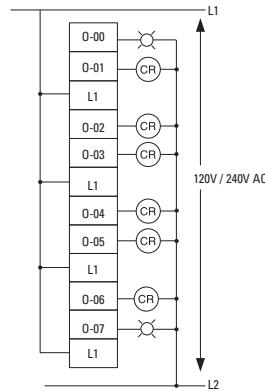

## Wire the Module

Included with your module is a single 12-pin Removable Terminal Blocks (RTB). Basic wiring of your module is shown below.

**2085-IA8 or 2085-IM8**

**2085-0A8**

# Specifications

## General Specifications

Attribute	2085-IA8	2085-IM8	2085-0A8
Number of I/O	8		
Dimensions HxWxD	28 x 90 x 87 mm (1.1 x 3.54 x 3.42 in.)		
Shipping weight, approx.	140 g (4.93 oz)		
Bus current draw, max	5V DC, 150 mA		5V DC, 180 mA
Wire size		Min	Max
	Solid	0.34 mm <sup>2</sup> (22 AWG)	2.5 mm <sup>2</sup> (14 AWG)
	Stranded	0.25 mm <sup>2</sup> (22 AWG)	2.5 mm <sup>2</sup> (14 AWG)
Insulation stripping length	10 mm (0.39 in.)		
Wiring category <sup>(1)</sup>	2 – on signal ports		
Wire type	Copper		
Terminal screw torque, max	0.5...0.6 N·m (4.4...5.3 lb·in) <sup>(2)</sup>		
Input/output circuit type	120V AC input	240V AC input	120V/240V AC output
Power supply	120V AC	240V AC	120V/240V AC
Power dissipation, total	2.36 W	2.34 W	5.19 W
Enclosure type rating	None (open-style)		
Status indicators	8 yellow channel indicators		
Isolation voltage	150V (continuous), Reinforced Insulation Type, channel to system Type tested @ 1950V DC for 60 s	240V (continuous), Reinforced Insulation Type, channel to system Type tested @ 3250V DC for 60 s	
North American temp code	T4		

- (1) Use this Conductor Category information for planning conductor routing. Refer to Industrial Automation Wiring and Grounding Guidelines, publication [1770-4.1](#).
- (2) RTB hold down screws should be tightened by hand. They should not be tightened using a power tool.

## Input Specifications

Attribute	2085-IA8	2085-IM8
Number of inputs	8	
Voltage category	120V AC	240V AC
Operating voltage range	74...120V AC	159...240V AC
Off-state voltage, max	20V AC	40V AC
Off-state current, max	2.5 mA	
On-state current, min	5.0 mA @ 74V AC	4.0 mA @ 159V AC
On-state current, max	12.5 mA @ 120V AC	7.0 mA @ 240V AC
Input impedance, max	22.2 kΩ	
Inrush current, max	450 mA	
Input filter time Off to On On to Off	≤20 ms	
IEC type compliance	Type 3	

**Output Specifications - 2085-0A8**

Attribute	Value
Number of outputs	8
Voltage category	120V/230V AC
Operating voltage range	120...240V AC
Output voltage, min	85V AC
Output voltage, max	240V AC
Off-state current, max	2.5 mA
On-state current, min	10 mA per output
On-state current, max	0.5 A per output
On-state current, per module, max	4 A
Off-state voltage drop, max	1.5V AC @ 0.5 A 2.5V AC @ 10 mA
Fusing	Not protected. A suitable rating fuse is recommended to protect outputs.
Output signal delay Off to On On to Off	9.3 ms for 60 Hz, 11 ms for 50 Hz 9.3 ms for 60 Hz, 11 ms for 50 Hz
Surge current, max	5 A

**Environmental Specifications**

Attribute	Value
Temperature, operating	IEC 60068-2-1 (Test Ad, Operating Cold), IEC 60068-2-2 (Test Bd, Operating Dry Heat), IEC 60068-2-14 (Test Nb, Operating Thermal Shock): -20...+65 °C (-4...+149 °F)
Temperature, surrounding air, max	65 °C (149 °F)
Temperature, nonoperating	IEC 60068-2-1 (Test Ab, Unpackaged Nonoperating Cold), IEC 60068-2-2 (Test Bb, Unpackaged Nonoperating Dry Heat), IEC 60068-2-14 (Test Na, Unpackaged Nonoperating Thermal Shock): -40...+85 °C (-40...+185 °F)
Relative humidity	IEC 60068-2-30 (Test Db, Unpackaged Damp Heat): 5...95% noncondensing
Vibration	IEC 60068-2-6 (Test Fc, Operating): 2 g @ 10...500 Hz
Shock, operating	IEC 60068-2-27 (Test Ea, Unpackaged Shock): 25 g
Shock, nonoperating	IEC 60068-2-27 (Test Ea, Unpackaged Shock): 25 g - for DIN rail mount 35 g - for panel mount
Emissions	IEC 61000-6-4
ESD immunity	IEC 61000-4-2: 6 kV contact discharges 8 kV air discharges
Radiated RF immunity	IEC 61000-4-3: 10V/m with 1 kHz sine-wave 80% AM from 80...6000 MHz
EFT/B immunity	IEC 61000-4-4: ±2 kV @ 5 kHz on signal ports ±2 kV @ 100 kHz on signal ports
Surge transient immunity	IEC 61000-4-5: ±1 kV line-line(DM) and ±2 kV line-earth(CM) on signal ports
Conducted RF immunity	IEC 61000-4-6: 10V rms with 1 kHz sine-wave 80% AM from 150 kHz...80 MHz

## Certifications

Certification (when product is marked) <sup>(1)</sup>	Value
