DLT-V4108: Digital Logistics Terminal of the Advantech-DLoG product portfolio

DLT	V	4	1	08
Digital Logistics Terminal	Vehicle Mount	Positioning of the family within the portfolio	First Generation	8" Display size

DLT-V4108

Always on – 24 hours a day, seven days a week!

Complete protection

Interference-free Wi-Fi and LTE connection

- Optional LTE and GPS
- Best signal transmission even in closed vehicles through external antenna
- Latest technology delivering best connectivity and tracking

Wide selection of mounting options

- Various mounting concepts for the terminal itself
- Customer-specific developments possible
- Premium quality

Complete system ruggedized

- Protection against shock and vibration
- IP65 rated for protection against dust and water
- Extended temperature range -30 to +50°C

Always on.

Features:

- Intel E3826 Dual Core 1.46 GHz with 4 GB RAM
- Color-TFT 8" wide screen with PCT touch
- Integrated keyboard
- LTE, GPS, Wi-Fi, BT
- Uninterruptible Power Supply (UPS)
- Extreme temperature range -30 to +50 °C
- Fully rugged, IP65 and 5M3 for the complete system

Communicate cost-effectively into existing LTE networks!

Companies require continuous access to their devices and applications. In order to ensure a smooth and complete process in the areas of logistics, ports and heavy duty, vehicle terminals need to be permanently online.

The integrated keyboard simplifies data capture and reduces errors through haptic feedback. Further investments on an external keyboard are unnecessary.

The integrated UPS protects the terminal from voltage drops and enables a quick and easy vehicle battery change without losing connection to the IT environment. Of course the entire unit is IP65-rated and therefore resistant to vibration, shock, water and dust.

With features such as LTE and GPS, the DLT-V4108 is always online

PCT touch panel for maximum handling comfort

- 8" Color-TFT
- Sunlight readable
- Operable with gloves
- Multi touch - scratch and abrasion resistant

Integrated Keyboard

- 55 keys keyboard incl. number pad
- QWERTY version
- 12 front keys
- Simple and easy data capture

Reliable in harsh environments

Protection class IP65

Brilliant PCT display

With a feature set tailored to market requirements, DLT-V4108 is especially suited for 24/7 operations due to its optional on board Wi-Fi and LTE. DLT-V4108 provides best signal transmission even in closed vehicles cabins.

Integrated UPS (uninterruptible power supply) for continuous operation

- Bridges power failure of up to 15 minutes
- During vehicle battery exchange, terminal stays connected
