DLT-V7210K

Complete Protection

Interference-free Wi-Fi connection

- Antenna diversity (usage of multiple antennas) reduces interferences
- Wi-Fi antenna with low profile in high transmission quality with increased resistance to external forces
- External antennas available

Wide selection of mounting and fitting options

- Different mounting and fitting concepts for the terminal itself and corresponding accessories
- Customer-specific developments possible
- Premium quality

Key.Fact.

Features:

- Energy-saving Intel® ATOM™ Quad Core processor with 4 GB DDR3
- Extremely robust PCT touch screen
- Illuminated and field replaceable keyboard, including number pad
- Integrated uninterrupted power supply (optional)
- Highly reliable Wi-Fi transmission; Bluetooth (optional)
- Outstanding robustness of the overall system (5M3, IP65, IK08)

Ideally suited for logistics applications with frequent and extensive data input

All sorts of logistics applications put industrial PCs to the test.

Extreme weather effects, dirt and dust, vibrations and hard impacts strain mechanical and electronic components substantially. The DLT-V7210K withstands extreme demands with no trouble at all.

Every detail of this robust touch screen terminal was developed for a long service life and high reliability. The result exceeds industrial standards by far. The unique combination of PCT touch screen and integrated keyboard enables fast, simple and accurate data input. The integrated keyboard is field replaceable, which keeps the maintenance and repairs required for the DLT-V7210K low and ensures failure-free, continuous operation.

With a feature set that is tailored to the market requirements, the DLT-V7210K excels at tasks, that require large amounts of data input.

Touch Panel for maximum user comfort

- Large 10,1" screen for excellent readability even under bright sunlight
- Break and abrasion resistant PCT touch screen
- Useable with gloves
- Multi touch operable

Field replaceable, integrated Keyboard

- 55-key keyboard with number pad
- Available in three country-specific versions: QWERTY, QWERTZ, AZERTY
- Brightness adjustable independently of display brightness
- Fast and simple data input

Protection
Class IP65

Display

Consistently
Reliable

A powerful processor, a wide range of operating systems, and further comprehensive configuration options cover the entire spectrum of applications. In addition, the DLT-V7210K offers a wide variety of interfaces and wireless technologies, as well as mounting concepts for practically every vehicle.

Integrated UPS (uninterruptable power supply) for continuous operation

- Terminal stays in application even when vehicle battery gets exchanged
- Bridges power losses up to 20 minutes
- Battery is quickly replaceable through easy accessible battery slot at the top side of the terminal
- Subsequent equipment of terminal with battery
