

## DSCA42

# 2-Wire Transmitter Interface Signal Conditioners with Loop Power

## **Description**

Each DSCA42 2-wire transmitter interface module provides a single channel of 4 to 20mA process current input which is filtered, isolated, amplified, and converted to a high-level voltage output (Figure 1). An isolated 24V power supply is provided to power the 2-wire transmitter. Signal filtering is accomplished with a five-pole filter which is optimized for step response. An anti-aliasing pole is located on the field side of the isolation barrier, and the other four poles are on the system side. After the initial field-side filtering, the input signal is chopped by a proprietary chopper circuit. Isolation is provided by transformer coupling, again using a proprietary technique to suppress transmission of common mode spikes or surges.

Module output is either voltage or current. For current output models a dedicated loop supply is provided at terminal 3 (+OUT) with loop return located at terminal 4 (-OUT). The system-side load may be either floating or grounded.

Special input circuits provide protection against accidental connection of powerline voltages up to 240VAC and against transient events as defined by ANSI/ IEEE C37.90.1. Protection circuits are also present on the signal output and power input terminals to guard against transient events and power reversal. Signal and power lines are secured to the module using screw terminals which are in pluggable terminal blocks for ease of system assembly and reconfiguration.

The modules have excellent stability over time and do not require recalibration, however, zero and span settings are adjustable up to  $\pm 5\%$  to accommodate situations where fine-tuning is desired. The adjustments are made using potentiometers located under the front panel label and are non-interactive for ease of use.

### **▶** Features

- · Accepts Process Loop Signals
- Industry Standard Output of 0 to +10V, 2 to +10V, 0 to 20mA, or 4 to 20mA
- Provides Isolated Loop Excitation
- 1500Vrms Transformer Isolation
- ANSI/IEEE C37.90.1 Transient Protection
- · Input Protection to 240VAC Continuous
- True 3-Way Isolation
- Wide Range of Supply Voltage
- 105dB CMR
- · 5 Poles of Filtering
- ±0.03% Accuracy
- ±0.01% Linearity
- · Easily Mounts on Standard DIN Rail
- · C-UL-US Listed
- · CE and ATEX Compliant

#### NOTES:

### Installation Notes:

- 1.) This Equipment is Suitable for Use in Class I, Division 2, Groups A, B, C, D, or Non-Hazardous Locations Only.
- $2.) \ Warning Explosion \ Hazard Substitution \ of \ Components \ May \ Impair \ Suitability \ for \ Class \ I, \ Division \ 2.$
- 3.) Warning Explosion Hazard Do Not Disconnect Equipment Unless Power Has Been Switched Off or The Area is Known to be Non-Hazardous.

## **Ordering Information**

Model	Input Range	Output Range
DSCA42-01	4mA to 20mA	0V to +10V
DSCA42-02	4mA to 20mA	2V to +10V
DSCA42-01C	4mA to 20mA	4 to 20mA
DSCA42-01E	4mA to 20mA	0 to 20mA
