HMT-1Z1

March 2018

POWER

The Spare Battery is an extra 3250mAh lithium ion battery for the HMT-1. Batteries can be swapped in the field to extend operating time and minimize downtime. Extra batteries are also needed to cover any extra shifts. Extra batteries also minimize downtime in case a battery is ever misplaced or left uncharged.

Spare Battery (6-Pack)

HMT-1

SKU: 171014

The Multi-Charger simultaneously charges 6 HMT-1 batteries. Multi-chargers ensure fully charged batteries are available at the start of each shift. They are also necessary if it is not possible or practical to plug multiple HMT-1 devices into multiple USB cables and power outlets. Multi-chargers conveniently display the charge level of each battery on a high visibility backlit display, so battery levels can be determined at a glance. Each Multi-Charger ships with all 5 regional power adapters. Shown with batteries, not included.

POWER

The Battery Wall Charger is used with the USB Type-C Charging Cable to charge the HMT-1, and is used with the USB Cable with Charging Protection for charging the HMT-1Z1. Extra chargers and cables are needed if there are multiple locations where devices can be charged (eg. office, workstation, tool crib, or service vehicle). They also minimize downtime in case a charger is ever misplaced. Each HMT-1 / HMT-1Z1 ships with a regional charger; for international deployments or travel, regional wall chargers are also available.

SKU: 171016

The USB Cable with Charging Protection for HMT-1Z1 is an extra Micro-USB cable for data transfer and charging. The cable includes a safety box that protects the HMT-1Z1's safety circuits from power surges. These surges can damage the HMT-1Z1 and may occur when connecting the HMT1-Z1 to computers, wall chargers, car chargers, and other power sources that are not certified or approved as intrinsically safe. It is the only cable approved for charging the HMT-1Z1 and for moving files to and from the HMT-1Z1.

MOUNT / WEAR

The Tri-Band Strap is a head strap for the HMT-1 / HMT-1Z1 that replaces the standard Overhead Strap for a more secure fit. The Tri-Band Strap supports greater maneuverability and mobility (eg. in confined or reclined workspaces), and ensures superior fit and positioning of the device over a wider range of head sizes and shapes. The Tri-Band Strap is also needed to mount the device when wearing a bump cap or baseball cap.

The Tri-Band Strap is sold with or without the Bump Cap, a comfortable, breathable cap with a removable impact-resistant liner. The Bump Cap is suitable for environments that require head cover but do not require hard hats. The short brim also provides shade without interfering with the HMT-1.

HMT-1

SKU: 171093

The Overhead Strap and Rear Pad are the standard straps and pads that come with the HMT-1. The Overhead Strap is the standard head strap and is worn with the device when a hard hat, bump cap, or Tri-Band Strap is not used. The Rear Pad is the standard cushioned pad that attaches to the interior band of the device. With regular use, wear and tear of the straps and pads are normal and they are designed to be replaced periodically.

PROTECT / CARRY / STORE

The Ear Bud Hearing Protection Headphone plays audio from the HMT-1 / HMT-1Z1, and provides hearing protection from high noise environments. They have replaceable foam tips made of premium memory foam, and are 33dB NRR (Noise Reduction Rated). They provide privacy for any incoming audio, and provide an optimal experience for audio applications such as video conferencing, video instructions, workflows, etc. The headphones are designed with a custom cable length and right angle connector optimized for use with the HMT-1 / HMT-1Z1. Each headphone comes with a pair of Medium foam tips; other sizes are available separately.
